

CONCRETE DELIVERY AND PUMPING SERVICES ALL AROUND SWEDEN

ABOUT US

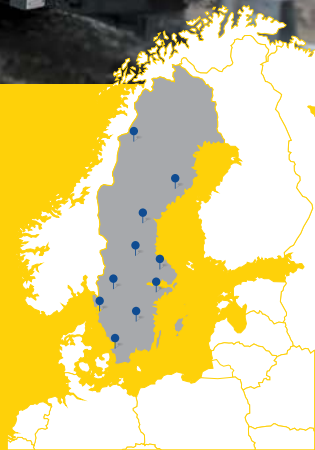

MB Grupa is the largest producer of ready mixed concrete and precast in the Baltics, successfully operating in the Baltic and European region since 1998. Together with its partners, the company's branch in Sweden provides a full range of concrete delivery and pumping services.

Our particular attention has been devoted to providing concrete delivery and

pumping services using minipumps/trailer pumps all around Sweden.

We use concrete lab and research services to ensure the consistent quality of our concrete.

We offer the services of mobile concrete plants, to ensure the availability of high-quality concrete at any construction site.

MB Grupa main project regions

Capacity to handle 10+ construction sites

Pumping concrete 100+ m height

Laboratory to ensure concrete quality

Large fleet of concrete pumping vehicles

CONCRETE DELIVERY AND PUMPING SERVICES ALL AROUND SWEDEN

MAIN SERVICES

CONCRETE DELIVERY AND PUMPING SERVICE

We deliver and pump concrete at various types of construction sites, specialising in non-standard structures.

- Concrete pumping services:
 - for high-rise buildings
 - in hardly accessible areas
 - in narrow construction sites
 - in public areas
 - in sites with strict work culture requirements

MOBILE CONCRETE PLANT SERVICE

Setting up mobile concrete plants at construction sites makes it possible to reduce costs and ensure the production of high-quality concrete products.

- Effective production of high-quality concrete at the construction site
- Transportation time reduced to a minimum
- Consistent concrete characteristics for all types of concrete
- High concrete delivery speed

OTHER SERVICES

RESEARCH

Development of new and innovative concrete products.

- Pigmented concrete
- Lamina: ultra thin high performance concrete products
- Terrazzo concrete products
- 3-layer reinforced concrete element with ultra thin outer concrete layer

LABORATORY

We take an extra care to test the raw materials and our end product to ensure the consistent quality of our concrete.

- Quality control
- Raw material control
- Concrete sample testing
- Professional consulting
